

Hyperboloids

\$25 per package of 10, plus shipping costs

Sizes - There are 5 sizes of **hyperboloids**. They were prepared according to the size of the teeth, and the formation of the dental arch.

- **PP** : children, adolescents;
- **P** : Small children aged 4-10 years;
- **M** : Medium, for teenagers, but is widely used in adults;
- **G**: Great, has robust constitution, indicated for patients with big teeth and wide dental arch;
- **GG** : Extra Large - to increase mouth opening, with gradual exercises, with previous sizes (each for 10 days using the PMG) to arrive at the GG.
